

Task 5: Exploratory Data Analysis Report

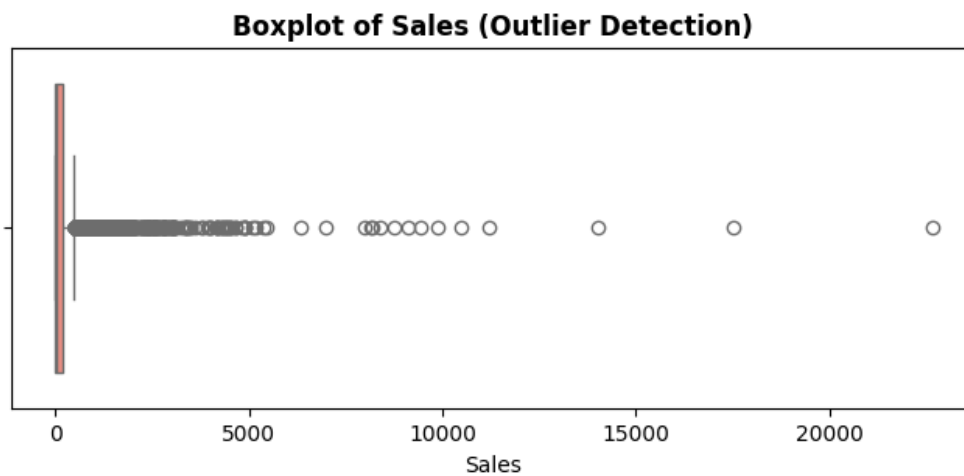

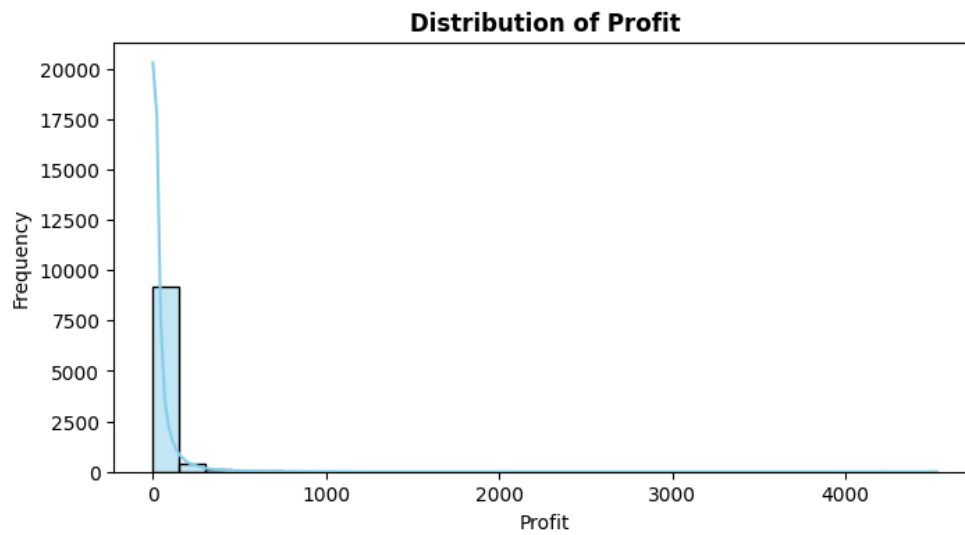

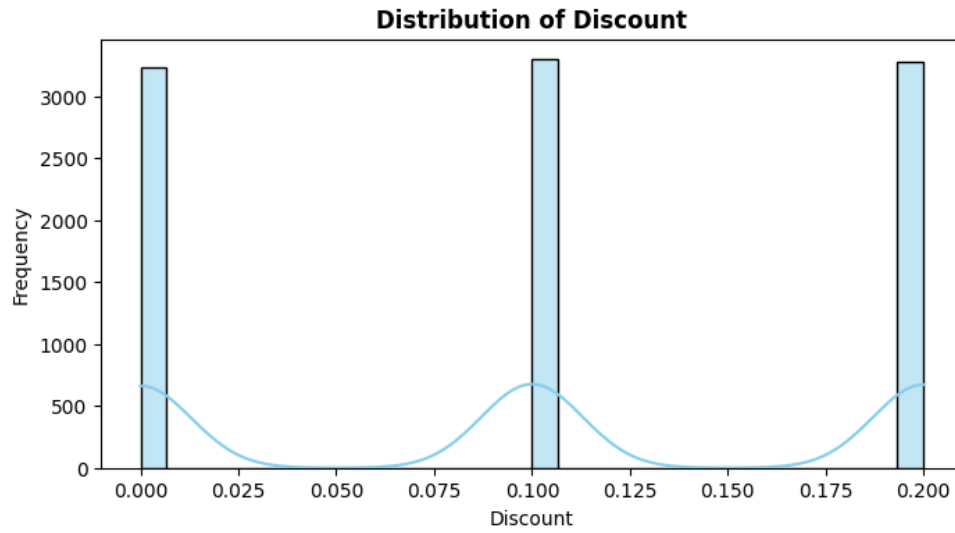

Superstore Sales & Financial Data

1. Findings & Insights Summary

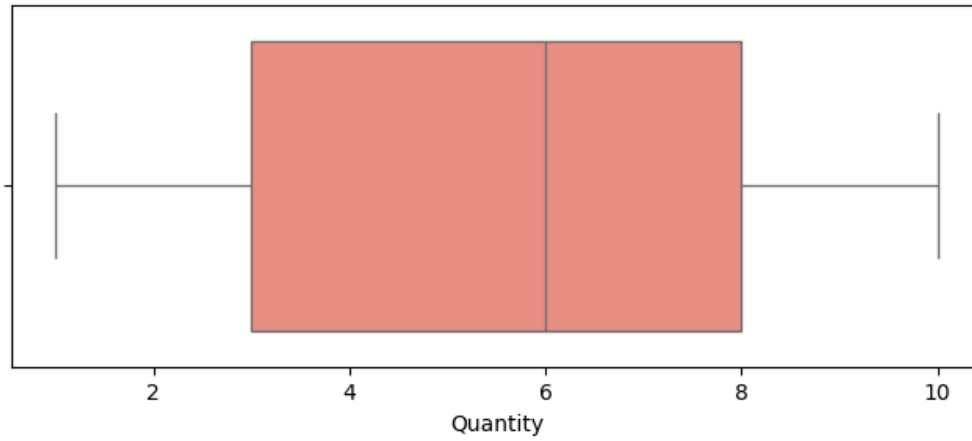

- **Distribution Patterns:** Note whether metrics (Sales, Revenue, Profit) follow normal or skewed distributions.
- **Correlations & Drivers:** Highlight strong positive correlations (e.g., Quantity sold vs. Total Revenue) or negative correlations (e.g., Higher Discount rates reducing Net Profit Margin).
- **Outliers & Anomalies:** List extreme transactions or negative profit entries requiring business investigation.

2. Key Visualization

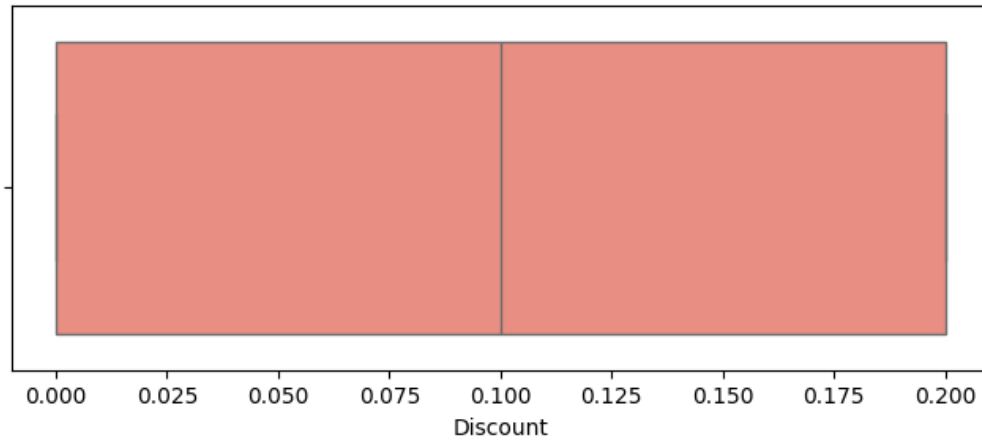

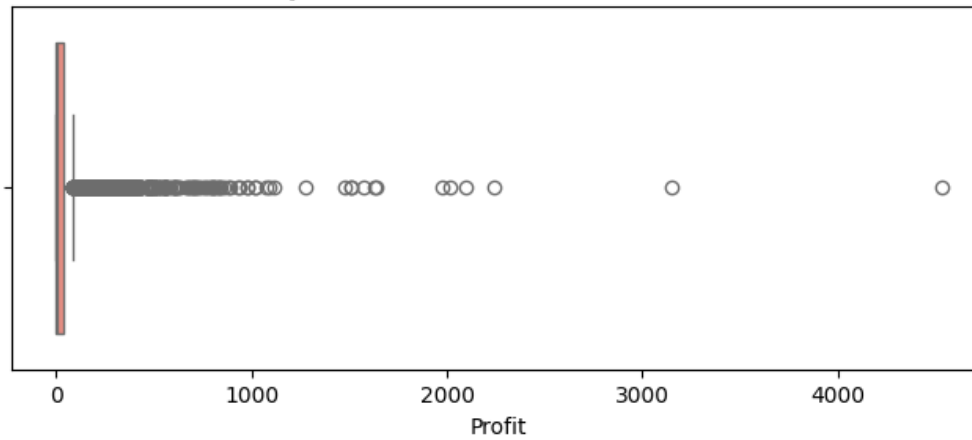

Boxplot of Quantity (Outlier Detection)

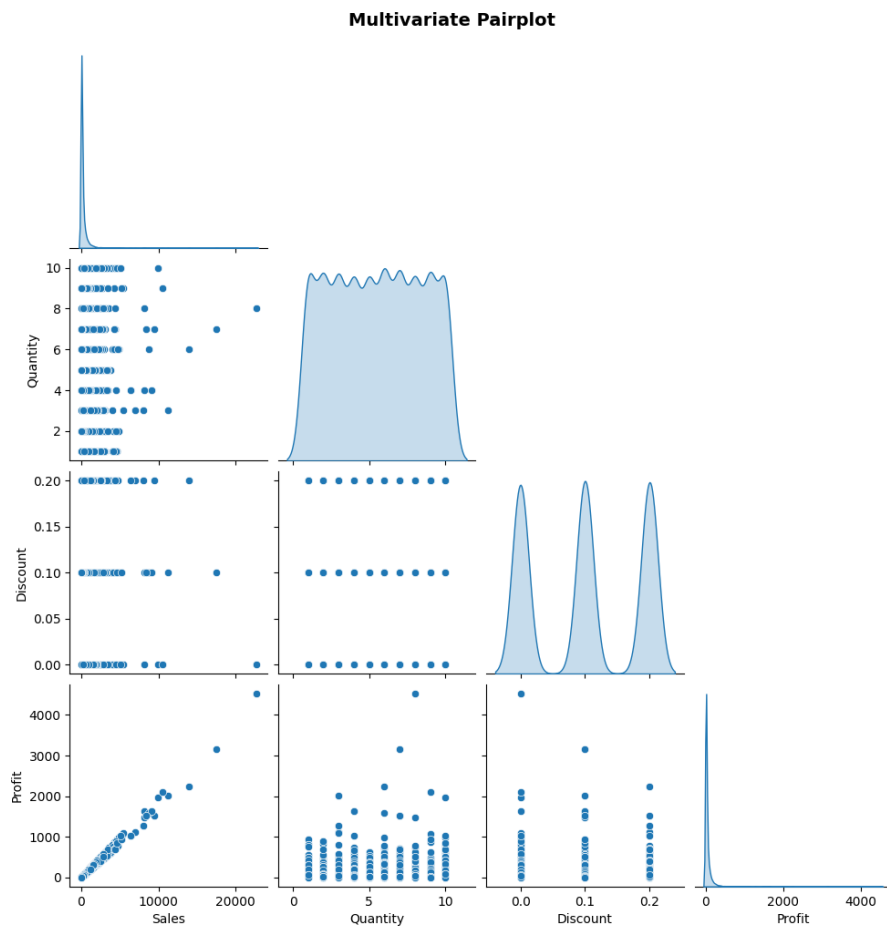

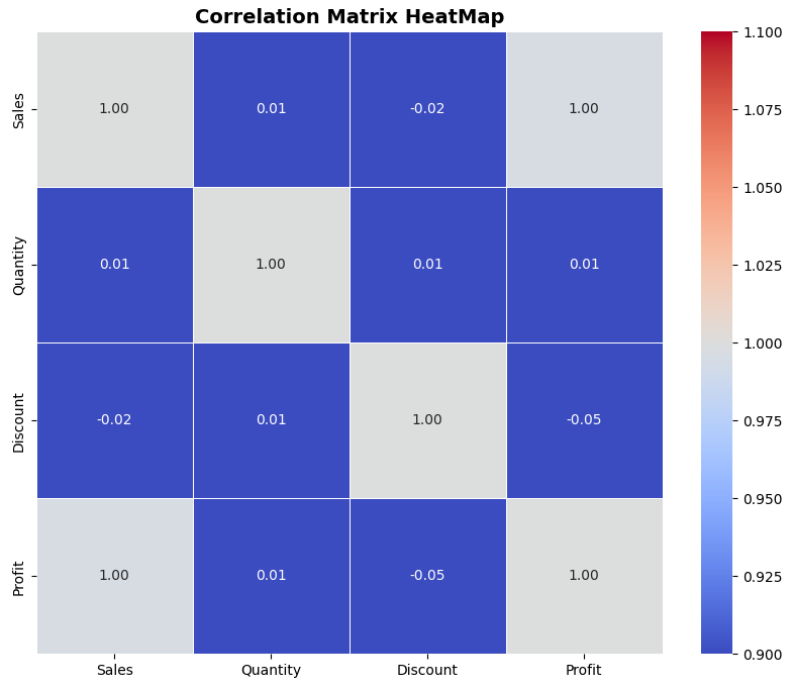

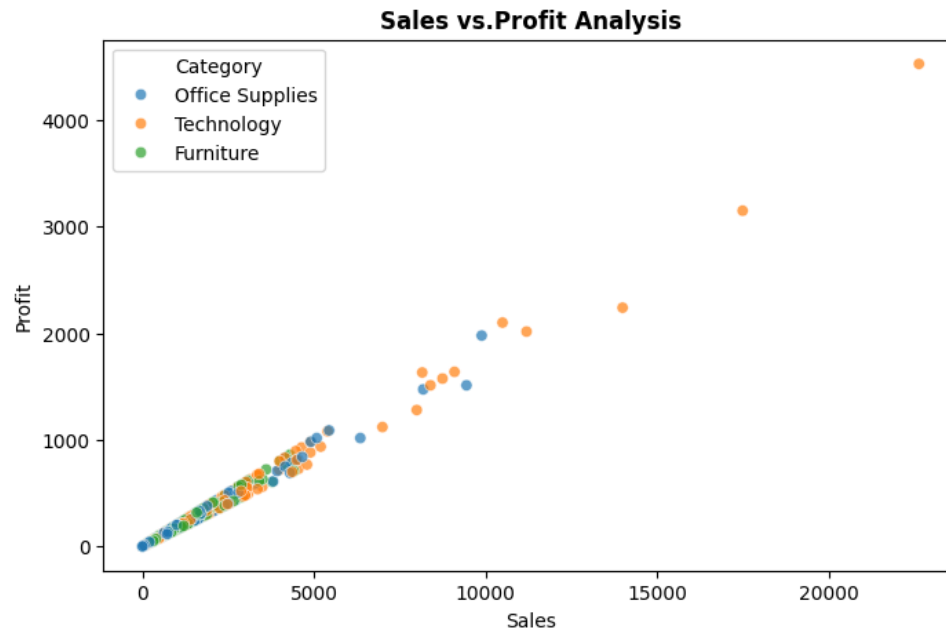

Boxplot of Discount (Outlier Detection)

Boxplot of Profit (Outlier Detection)

3Strategic Business Recommendations

1. **Target Technology Category:** Focus account management efforts on Technology category sales, which drive top-tier revenue and profit margins.
2. **Govern Discount Tiers:** Maintain the strict 20% discount cap to prevent margin erosion on high-value orders.
3. **Inventory Management:** Maintain uniform inventory buffer stock across 1–10 unit quantities due to consistent ordering frequency across all volume levels.
